

DRAG KING BASEBALL FIELD DRAG

Models 10001665 & 10001592

Your Drag King box should include:

Basic Unit:

- (2) Drag sections
- Cut & level and debris basket
- Pull chain with anchor shackle
- (4) Quick link connectors

Optional Scarifier

- Scarifier blades section
- (2) Quick link connectors

ASSEMBLY

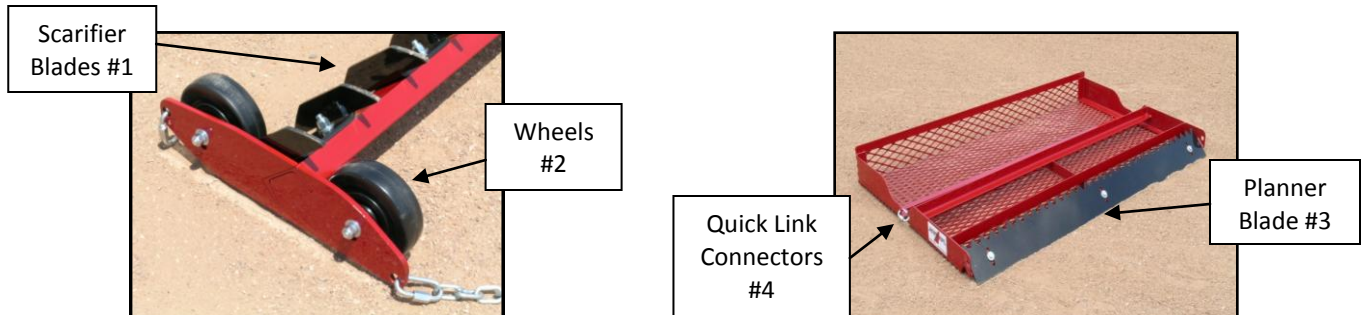

1. Remove drag sections from box and lay out on ground one behind the other with debris basket at rear. If the optional Scarifier was purchased, place it in the front of the sections.
2. Unscrew the quick link connectors (#4). Use two connectors to attach the pull chain to the corner eye bolts on the first section. Use two connectors (one on each side) to attach the remaining sections to each other. The anchor shackle is used to connect the chain to the tractor's hitch.
3. The planer blade (#3) is shipped in the "up" position. Keep the blade in this position when pulling by hand. Use two 1/2" or adjustable wrenches to loosen the retainer bolts and lower the planer blade (#3) to take up to a 1" deep cut when pulling the Drag King with a tractor. For "hard packed" soil, remove the retaining nuts and bolts, reverse the blade placing the serrated side down and adjust for the depth you want. Use the smooth edge for leveling.

NOTE: When pulling with a tractor, adding concrete blocks or other "ballast" will help your Drag King to cut better.

5. The Scarifier has two positions. Put the Scarifier blades (#1) down to cut. Flip the Scarifier over to ride on the wheels (#2) and not cut. The Scarifier blades (#1) may be reversed when worn for added wear.
