Tools Require:

- 1/2" Socket or Box Wrenches
- Level
- Tape Measure
- 8 ft to 10 ft step ladder

- Unpack all parts and check against parts list to ensure that all have been included.
- Inspect all parts for damage. Report any damages to the trucking company.

See additional parts see Maintenance on the last page.

IMPORTANT NOTICE:

The LC-6, Little Champ is designed for youth play only, specifically for children between the ages of 5 to 11 yrs old.

The LC-6, Little Champ, is not designed to be used for slam dunking. Slam dunking may result in damage to the unit, or serious injury.

CAREFULLY READ ALL INSTRUCTIONS AND WARNINGS BEFORE INSTALLING AND USING THE LITTLE CHAMP.

The Little Champ should be set-up and removed only by authorized adults who are familiar with the handling procedures contained herein.

The Little Champ should be used only under close supervision of authorized adults.

Two adults are required to safely install and remove the Little Champ. One person is required to assist in lifting the unit and then helping to guide it over the rim and into place.

The entire Little Champ unit weighs about 50 lbs. Do not attempt to install the Little Champ by yourself, or if the weight exceeds that which you can safely handle over your head.

Always employ safe lifting techniques when lifting the Little Champ into place. Although the Little Champ may be installed from the floor, the use of a step ladder is highly recommended.

The Little Champ should only be installed on a sturdy backstop and rim system. Do not install the Little Champ if the backstop system, including rim and backboard are not sound.

Do not install the Little Champ on a rim that is compromised or is not level.

When not in use, the Little Champ should be removed and stored away to prevent unauthorized use.

Before each use, thoroughly inspect the unit to ensure it is properly installed and all hardware is secured. Make sure the unit is not dislodged on the rim prior to any use.

According to the BGC (Boys and Girls Club) Youth Basketball Rules the following goal heights are recommended:

- 5-6 yrs old should play at 8 ft goal height
- 7-8 yrs old should play at 8 ft goal height
- 9-11 yrs old should play at 9 ft goal height

DESCRIPTION:

The LC-6 Little Champ is designed to attach to a standard regulation size rim whose height is at 10 ft. The LC-6 has the following design features and assembling considerations:

- The Little Champ is designed to sit over the rim and lock into place by grabbing underneath the backboard.
- Adjustable bumpers are spaced along the rim mounting frame, at the front and sides, in order to pick up the inner ring of the rim.
- The support arms that come preassembled are designed to fit on a standard 42” rectangular backboard, with or without edge padding.
- Older backboards whose height is greater than 42” may require larger support arms. The Little Champ Extended Support Arm Kit (LC-AKIT) comes with 2 sets of longer support arms to accommodate larger or older style backboards.
- Before beginning, verify that the unit will fit on the backboard you have by measuring the distance from the top of the goal to the bottom of the backboard. (*See Verify Support Arm Fit instruction, on page 6.*)
- Initial set-up requires that the mounting frame be adjusted to achieve the best fit on the rim and the type of backboard. Initial set-up is done without the Little Champ backboard and rim installed.

IMPORTANT: Verify Support Arm Fit

The LC-6 comes preassembled with support arms that fit a standard 42" backboard, with or without edge padding. Larger or older style backboards may require larger support arms. The distance from the top of the goal to the bottom of the backboard needs to be measured to confirm that unit will fit.

- Measure the distance from the top of goal to bottom of existing backboard, including edge padding if installed.
- If this dimension exceeds 8", the Extended Support Arm Kit, P/N: LC-AKIT is required.

*If this dimension measures 8" or less, the arms provided on the unit are correct.

*Requires medium support arms.
(Included in LC-AKIT)

*Requires large support arms.
(Included in LC-AKIT)

I. Initial Set-Up:

Note: Initial setup is done using only the Little Champ frame without the backboard and rim installed.

- 1) Remove the Little Champ frame from the box. Check that all components and hardware are present. Assemble the rear arms to frame (see Figure 1).
- 2) Set the Little Champ frame on the rim and adjust the bumpers, along the front bracket and side rail (without Little Champ backboard or rim installed). As rims may vary slightly in dimension and degree of out-of-roundness, the first step is to adjust the bumpers so the frame is snug within the rim (see Figure 2).

Note: If the rim is badly out of level it should first be replaced or leveled (insert one or two washers between the mounting plate and backboard, on the lower two mounting bolts only).

- 3) Adjust the height and depth of the arms so they grab beneath the backboard, while keeping the front of the frame essentially plumb (see Figure 3). *If necessary, replace the support arms with the larger ones, to accommodate backboards other than 42" (see Figure 1).*
- 4) Using a level, adjust the front frame to make it plumb (see Figure 4). Secure all hardware.
- 5) Carefully remove the frame, by tilting and lifting it off the rim and away from the backboard.
- 6) Practice installing and removing the frame to get a feel for the action of lifting it over the rim and engaging the backboard.
- 7) Install the backboard mounting brackets onto the front frame (see Figure 5).
- 8) Install the backboard onto the front frame (see Figure 6).
- 9) Install the rim and handle (see Figure 7).
- 10) Apply important warning labels as shown in Figure 8.
- 11) Install the completed unit on the rim and adjust the degree of plumb, if needed. If the unit cannot be plumbed the rim may be too far out of level.

Note: Two adults are required to safely install the Little Champ (see Figure 9).

- 12) Check that the Little Champ is soundly seated on the rim and the two support arms are locked beneath the board.

Figure 1 (Typical Support Arms)

Warning: Do not over tighten curve washer hardware will deform.

PLACE WARNING LABELS AS SHOWN BELOW.

Figure 8 (*Warning Lable Placements*)

II. Installing the Little Champ:

1. Open the support arms and lock the braces in place.

Note: Although possible to install the Little Champ from the floor without a ladder, use of a step ladder is highly recommended. If not using a step ladder, extend the backboard of the Little Champ to its lowest position.

2. With the assistance of a second adult lift the Little Champ onto the rim using a tilting action to engage the support arms beneath the backboard.
3. Lock the unit in place by lightly pulling down on the Little Champ board and rim.
4. Check that the Little Champ is properly installed, by ensuring that the bumpers and support arms are properly engaged.

Figure 9 (Install Pictures Step by Step)

III. Adjusting Height:

1. Get a step ladder and bring the unit down before taking the pin out. DO NOT adjust height when unit is attach to the rim, UNIT WILL FREE FALL DOWN. Recommend two people when adjusting height, see image below .
2. Adjust to the desired height as displayed on the side height label. And reattach unit back on rim.

IV. Removal and Storage:

Note: Removing the Little Champ should only be done by two adults.

1. Using a lift and tilt action, lift the Little Champ off the rim and carefully lower it to the ground.

Storage:

1. Raise board to the highest position.
2. Fold support arms down and lock in place.
3. Fold rim to stored position.
4. Wheel Little Champ into storage area

Figure 10 (How To Remove)

IV. Maintenance:

- Before each use, check that all hardware is secured. Inspect the frame for damage or wear.

Note: Do not use the Little Champ if you suspect the frame or components have been compromised. Contact Jaypro Sports at 800-243-0533 for replacement parts.
