

BASEBALL LEG GUARD SIZING

Leg guards are best measured while seated. Measure from the bottom of the shin (roughly the ankle bone) to the center of the knee (center of knee cap or point where your knee pivots). *This measurement ('A' shown below) is more important than any age ranges which are only a rough guideline.*

Leg Guard Measurement	Youth Models
12.5"	LG-TS-79 (Top Star)
13.5"	LG-TS-912 (Top Star)
15.5"	LG-TS-1216 (Top Star)
