SHELTER CARE INSTRUCTIONS

Kwik Goal shelters are made with the best materials available for outdoor use. However, long term weather exposure will diminish their appearance. Storing shelters out of direct sunlight, or indoors, whenever practical will prolong their life.

Direct contact covering of shelters is NOT recommended. Trapped moisture, dirt, and increased temperature may cause more damage than leaving the units exposed to weather. If a cover is used, be sure it is made of a breathable, heat reflective material.

For best appearance, occasional cleaning of your shelter and seating may be necessary. It is important to use proper procedures and materials to avoid damaging surfaces and finishes.

1. Choose an appropriate time of day and location. Avoid direct sunlight and high temperatures.
2. Remove luxury seats and clean separately, according to LUXURY SEAT CLEANING INSTRUCTIONS below. Benches and molded seats may be cleaned with shelter.
3. Rinse thoroughly with clean, warm water to remove loose dirt.
4. Use a soft microfiber cloth or non-abrasive sponge with diluted, mild soap to gently wash the unit. Joy® and Palmolive Liquid® are acceptable mild soaps.
5. Immediately rinse thoroughly with clean, warm water.
6. Dry with a soft, clean cloth to prevent water spots.

NOTE: DO NOT use ammonia or ammonia based cleaners. Most formulas of Windex® contain ammonia.

LUXURY SEAT CLEANING INSTRUCTIONS

1. Use a soft cloth dampened with 10% mild dish soap and warm water solution to wipe vinyl seating and metal framework clean. Joy® and Palmolive Liquid® are acceptable mild dish soaps.
2. Wipe with soft cloth dampened with plain warm water to remove soap solution.
3. Allow to air dry.

**NOTE: Avoid drenching or flooding luxury seats with water.
DO NOT use silicone based protectants on vinyl seating.**
