

TeamPod™

HELPFUL TIPS!

- 1. The TeamPod is designed for 3-6 people sitting or up to 8 people standing.**
Click [here](#) to view other pod types & sizes.
- 2. Use care when opening the box.**
Be careful not to cut the fabric of the Pod when opening.
- 3. Get familiar with your Pod.**
Set up and fold a few times before taking your Pod to the field.
- 4. IMPORTANT – Take care the first time you zip the front door!**
Because your Pod has been folded for some time, the clear PVC door needs to “relax” and stretch out. While zipping the door shut for the first time, stretch the material flat. Keep the door closed to allow the material to stretch to full size. The door will be easier to zip after that.
- 5. Fill the sand bags before opening the Pod so they are ready when needed.**
- 6. Have at least two people to set up and take down your TeamPod.**
The TeamPod is very difficult to set up with only one person.
- 7. Attach the guy ropes BEFORE you set up the pod.**
This will make it easier to set the guy ropes if there is a breeze.
- 8. Zip down the side panels as soon as you open the pod.**
This will help let the wind pass through the side panels if there is a breeze.
- 9. If using on turf, get additional weight to hold the guy wires.**
Breezy conditions may require more weight.
- 10. If you have difficulty folding into a circle once the TeamPod is folded flat, try starting from the opposite corner.**
