## Roller Squeegee Double-Ribbed Style Assembly Instructions

### Tools Needed for Assembly:

- 7/16" wrench (two)
- 1/2" wrench

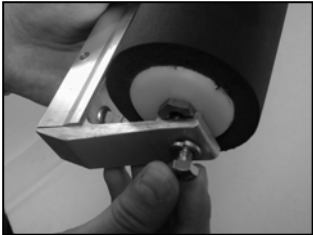

### Parts Shipped with Unit:

- Head assembly
- Aluminum handle (not pictured)
- Wrap-around brace (set of 2)
- Bolt bag
- Hook hardware bag

If Roller Squeegee comes without a protective cardboard tube, proceed to Handle Instructions.

If Roller Squeegee comes with a protective cardboard tube, follow these instructions:

1. DO NOT attempt to remove the tube by cutting.
2. On one end of roller, using a 1/2" wrench, remove the hex head bolt, loc washer and axle.
3. Slide off cardboard tube.
4. Replace axle, loc washer, and bolt as shown. Tighten.

### Handle Instructions:

1. Insert flat-tipped end of handle into channel-shaped crossbar. NOTE: This may be a tight fit requiring working the handle back and forth.
2. Align holes and insert middle sized bolt. Do not tighten until all hardware is in place.
3. Place hanging hook on label side of handle. Hook should be positioned so squeegee can be hung, with roller head up, for drying or storing.

### Wrap-Around Brace Instructions:

1. Align holes of flat end of braces with holes on head assembly and insert the two shortest bolts.
2. Align holes of wrap-around end of braces with the handle, as shown, and insert the longest bolt.
3. Start all loc nuts on bolts. Use wrenches to tighten, being careful not to over-tighten. Over-tightening may result in crushing the handle, thereby compromising its strength.

#### FULL WARRANTY

All Midwest Rake products carry a full warranty against manufacturer defects in quality and workmanship. Products which have been abused or worn out from normal use are excluded from this warranty. We reserve the right to replace or issue credit on an individual basis.
